## WTC Communications Launches in Kingston

**Communication just became easier. Now in Kingston, WTC Communications can be consumers "direct link to the future." From "ultra-fast internet access to wireless and dedicated access to VoIP (Voice over Internet Protocol) phone systems, WTC Communications offers true convergence and choice; Now it is about the consumers choice, not just more choice.**

***KINGSTON, ONTARIO, January 25, 2005*** - WTC Communications is a communication service provider which has been in business since 1932. We offer a full range of voice and data services. Our friendly professional team makes every effort to exceed the expectations of our customers while delivering state of the art communication solutions. In order to offer our communication products and services to the Greater Kingston Area, WTC Communications has opened their doors in Downtown Kingston.

Business and Residential consumers can benefit by partnering with WTC Communications:

- SPOC (Single Point of Contact) for ease of use
- Voice & Data convergence helps you to simplify daily tasks
- Working with an established company helps provides peace of mind
- Using present day leading edge technology offers you better tools
- Future visualization affords customers a research & development partner
- One Stop shopping provides savings, competitiveness, quality of service, support, & ease of purchase

"With honesty and integrity, WTC Communications wants to help contribute to the growth of all companies in the Greater Kingston Area. From the "entrepreneur" to the "medium to large companies", we believe and know that all organizations want to take their business to the next step, and that is our key role, to help them get there" says Tom Lynn, President, WTC Communications.

### **About WTC Communications**

WTC Communications, a long-standing foundation in communications, is committed to providing integrity connectivity solutions for society & the community at large. A leading provider of communications since 1932, with highly scalable, reliable products, and services, WTC's offering enables customers to leverage advanced communication technologies including Voice over Internet Protocol (VoIP), dedicated access, wireless access, internet access, long distance plans, as well as solution orientated alarm systems and monitoring. Utilizing innovative software and hardware technology; customers are able to deliver new and differentiated group communication services.

WTC is your single-point-of-contact for connectivity for voice & data; delivered from an established trusted company that has present day leading edge technology with future visualization. 'One Stop' shopping that promises savings, competitiveness, quality of service, support, and ease of purchase.
